

House Bill No. 989

An act relating to environmental protection; amending s. 403.813, F.S.; providing for applicability of a road and bridge project permit exemption to the Suwannee River Water Management District; requiring the Department of Environmental Protection to adopt a general permit that shall be applicable to qualified projects reviewed by the department or applicable water management district; providing for the repeal of this paragraph upon adoption of the general permit; deleting an obsolete provision relating to a report; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (t) of subsection (2) of section 403.813, Florida Statutes, is amended to read:

403.813 Permits issued at district centers; exceptions.—

(2) A permit is not required under this chapter, chapter 373, chapter 61-691, Laws of Florida, or chapter 25214 or chapter 25270, 1949, Laws of Florida, for activities associated with the following types of projects; however, except as otherwise provided in this subsection, nothing in this subsection relieves an applicant from any requirement to obtain permission to use or occupy lands owned by the Board of Trustees of the Internal Improvement Trust Fund or any water management district in its governmental or proprietary capacity or from complying with applicable local pollution control programs authorized under this chapter or other requirements of county and municipal governments:

(t) The repair, stabilization, or paving of existing county maintained roads and the repair or replacement of bridges that are part of the roadway, within the Northwest Florida Water Management District and the Suwannee River Water Management District, provided:

1. The road and associated bridge were in existence and in use as a public road or bridge, and were maintained by the county as a public road or bridge on or before January 1, 2002;

2. The construction activity does not realign the road or expand the number of existing traffic lanes of the existing road; however, the work may include the provision of safety shoulders, clearance of vegetation, and other work reasonably necessary to repair, stabilize, pave, or repave the road, provided that the work is constructed by generally accepted engineering standards;

3. The construction activity does not expand the existing width of an existing vehicular bridge in excess of that reasonably necessary to properly connect the bridge with the road being repaired, stabilized, paved, or repaved to safely accommodate the traffic expected on the road, which may include expanding the width of the bridge to match the existing connected

road. However, no debris from the original bridge shall be allowed to remain in waters of the state, including wetlands;

4. Best management practices for erosion control shall be employed as necessary to prevent water quality violations;

5. Roadside swales or other effective means of stormwater treatment must be incorporated as part of the project; ~~and~~

6. No more dredging or filling of wetlands or water of the state is performed than that which is reasonably necessary to repair, stabilize, pave, or repave the road or to repair or replace the bridge, in accordance with generally accepted engineering standards; and

7. Notice of intent to use the exemption is provided to the department, if the work is to be performed within the Northwest Florida Water Management District, or to the Suwannee River Water Management District, if the work is to be performed within the Suwannee River Water Management District, 30 days prior to performing any work under the exemption.

Within 30 days after this act becomes a law, the department shall initiate rulemaking to adopt a no fee general permit for the repair, stabilization, or paving of existing roads that are maintained by the county and the repair or replacement of bridges that are part of the roadway where such activities do not cause significant adverse impacts to occur individually or cumulatively. The general permit shall apply statewide and, with no additional rulemaking required, apply to qualified projects reviewed by the Suwannee River Water Management District, the St. Johns River Water Management District, the Southwest Florida Water Management District, and the South Florida Water Management District under the division of responsibilities contained in the operating agreements applicable to part IV of chapter 373. Upon adoption, this general permit shall, pursuant to the provisions of subsection (3), supersede and replace the exemption in this paragraph. The department shall submit a report to the Governor and the Legislature by March 1, 2004, to evaluate the effects of this exemption and make recommendations for the exemption to apply statewide.

Section 2. This act shall take effect upon becoming a law.

Approved by the Governor April 14, 2004.

Filed in Office Secretary of State April 14, 2004.
