

CHAPTER 2026-65

Committee Substitute for Committee Substitute for Senate Bill No. 484

An act relating to data centers; creating s. 163.326, F.S.; providing legislative findings; specifying that local governments maintain authority to exercise power and responsibility over comprehensive planning and land development regulations relating to large load customers; prohibiting a large load customer from being considered an electric substation; amending s. 288.075, F.S.; defining the term “data center”; providing an exception to a provision allowing an extension of certain confidentiality protections; creating s. 366.043, F.S.; providing legislative findings; defining terms; requiring public utilities to provide certain minimum tariff and service requirements for large load customers; requiring that such requirements ensure that large load customers bear their costs of service and that such costs are not shifted to the general body of ratepayers; requiring certain measures to minimize the risk of nonpayment of such costs; requiring that such minimum tariff and service requirements include certain provisions designed to prevent a public utility from providing electric service to a large load customer that is a foreign entity; prohibiting a customer from separating a certain electrical load into multiple smaller connections for a specified purpose; authorizing the Florida Public Service Commission to approve public utility tariffs that include certain utility industry-accepted ratemaking and other financial tools; prohibiting any tariff, contractual provision, service requirement, or other public utility policy from preventing or hindering the curtailment or interruption of electric service to a large load customer for certain purposes; prohibiting a public utility from knowingly providing electric service to a large load customer that is a foreign entity; requiring each public utility to file a tariff in compliance with the provisions of the bill by a specified date; amending s. 373.203, F.S.; defining terms; creating s. 373.262, F.S.; providing legislative intent; prohibiting the governing board of a water management district or the Department of Environmental Protection from issuing a permit for the consumptive use of water to a large-scale data center under certain circumstances; requiring that such permit be issued to a large-scale data center applicant if the applicant establishes that the proposed use of water satisfies certain requirements; requiring the governing board or the department to require the use of reclaimed water for a large-scale data center applicant’s allocation when certain requirements are met; specifying requirements for certain permit applications; prohibiting the approval of permit applications without a hearing; amending s. 373.239, F.S.; requiring that consumptive use permit modifications proposed by a large-scale data center be treated in a specified manner; requiring the Office of Program Policy Analysis and Government Accountability to contract for a study relating to the construction and operation of large-scale data centers; providing requirements for the study; requiring the study to be submitted

to the Governor, the President of the Senate, and the Speaker of the House by a specified date; providing effective dates.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Effective upon becoming a law, section 163.326, Florida Statutes, is created to read:

163.326 Large load customer considerations.—

(1) The Legislature finds that certain land uses, including facilities with substantial electric or other utility demands, such as data centers and other large load customers as defined in s. 366.043(2), may present unique planning, infrastructure, and compatibility considerations. The Legislature intends that such considerations shall be addressed through local comprehensive planning and land development regulations adopted pursuant to this chapter, including provisions related to infrastructure capacity, land use compatibility, environmental impacts, and the efficient provision of public facilities and services.

(2) Local governments shall maintain the authority to exercise the powers and responsibilities for comprehensive planning and land development regulation granted by law with respect to large load customers. A large load customer may not be considered an electric substation for the purposes of s. 163.3208.

Section 2. Paragraphs (a), (b), and (c) of subsection (1) of section 288.075, Florida Statutes, are redesignated as paragraphs (b), (c), and (d), respectively, paragraph (a) of subsection (2) is amended, and a new paragraph (a) is added to subsection (1) of that section, to read:

288.075 Confidentiality of records.—

(1) DEFINITIONS.—As used in this section, the term:

(a) “Data center” has the same meaning as in s. 373.203.

(2) PLANS, INTENTIONS, AND INTERESTS.—

(a)1. If a private corporation, partnership, or person requests in writing before an economic incentive agreement is signed that an economic development agency maintain the confidentiality of information concerning plans, intentions, or interests of such private corporation, partnership, or person to locate, relocate, or expand any of its business activities in this state, the information is confidential and exempt from s. 119.07(1) and s. 24(a), Art. I of the State Constitution for 12 months after the date an economic development agency receives a request for confidentiality or until the information is otherwise disclosed, whichever occurs first.

2. An economic development agency may extend the period of confidentiality specified in subparagraph 1. for up to an additional 12 months upon

written request from the private corporation, partnership, or person who originally requested confidentiality under this section and upon a finding by the economic development agency that such private corporation, partnership, or person is still actively considering locating, relocating, or expanding its business activities in this state. Such a request for an extension in the period of confidentiality must be received prior to the expiration of any confidentiality originally provided under subparagraph 1. This subparagraph does not apply to information described in subparagraph 1. relating to data centers.

If a final project order for a signed economic development agreement is issued, then the information will remain confidential and exempt for 180 days after the final project order is issued, until a date specified in the final project order, or until the information is otherwise disclosed, whichever occurs first. However, such period of confidentiality may not extend beyond the period of confidentiality established in subparagraph 1. or subparagraph 2.

Section 3. Section 366.043, Florida Statutes, is created to read:

366.043 Large load tariffs for public electric utilities.—

(1) The Legislature finds that the provision of safe and reliable electric services, provided at fair, just, and reasonable rates, is essential to the welfare of the ratepayers of this state. The Legislature further finds that when one class of electric service customer requires uniquely large electrical loads at a single location, it imposes a disproportionate risk on the other ratepayers of this state and makes it necessary for the commission to develop and enforce rate structures and other policies for such customers which ensure such risk is mitigated as much as possible and prevent shifting the costs of serving large load customers to the general body of ratepayers.

(2) As used in this section, the term:

(a) “Controlled by” means having the power to direct or cause the direction of the management or policies of a company, whether through ownership of securities, by contract, or otherwise. A person or an entity that directly or indirectly has the right to vote 25 percent or more of the voting interests of the company or that is entitled to 25 percent or more of its profits is presumed to control the entity.

(b) “Foreign country of concern” has the same meaning as in s. 692.201.

(c) “Foreign entity” means an entity that is:

1. Owned or controlled by the government of a foreign country of concern;
or

2. A partnership, an association, a corporation, an organization, or other combination of persons organized under the laws of or having its principal

place of business in a foreign country of concern, or a subsidiary of such entity.

(d) “Large load customer” means a customer with an anticipated monthly peak load of 50 megawatts or more, calculated as the highest average load over a 15-minute interval at a single location. The term does not include a load aggregated across multiple locations owned by the same customer. However, the term includes all customers or other entities that have entered into a colocation or similar agreement at a single location that otherwise meets the anticipated monthly peak load provided in this paragraph.

(e) “Public utility” has the same meaning as in s. 366.02, except that the term does not include a gas utility.

(3) The following minimum tariff and service requirements for large load customers are required in public utility tariffs:

(a) The minimum tariff and service requirements must reasonably ensure that each large load customer bears its own full cost of service and that such cost is not shifted to the general body of ratepayers. Such cost of service includes, but is not limited to, connection, incremental transmission, incremental generation, and other infrastructure costs; operations and maintenance expenses; and any other costs required to serve a large load customer. The risk of nonpayment of such costs may not be borne by the general body of ratepayers.

(b) The minimum tariff and service requirements must include provisions reasonably designed to prevent a public utility from providing electric service to a customer that would otherwise qualify as a large load customer if that customer is a foreign entity.

(4) A customer may not separate an electrical load at a single location into multiple smaller connections to avoid being classified as a large load customer.

(5) To effectuate the requirements of subsection (3), the commission may approve public utility tariffs that include utility industry-accepted rate-making and other financial tools, including, but not limited to, the following:

(a) Contributions in aid of construction or other required customer infrastructure investments that may be returned, in whole or in part, to such customers over time.

(b) Demand charges, including minimum demand charges.

(c) Incremental generation charges.

(d) Financial guarantees.

(e) Minimum load factors.

(f) Take-or-pay provisions or similar provisions requiring payment for contracted capacity, regardless of a large load customer's actual electricity use or demand.

(g) Minimum period of service contract requirements, including early termination fees or other fees for violation of such contracts.

(6) Any tariff, contractual provision, service requirement, or other public utility policy relating to large load customers may not prevent or otherwise hinder the curtailment or interruption of electric service to a large load customer where such curtailment or interruption is intended to ensure grid stability, reduce the likelihood or breadth of wider service outages, or ensure public safety during an emergency or other exceptional circumstance.

(7) A public utility may not knowingly provide electric service to a customer that would otherwise qualify as a large load customer if that customer is a foreign entity.

(8) No later than October 1, 2026, each public utility shall file, for commission approval, a tariff that complies with this section.

Section 4. Effective upon becoming a law, subsections (3) and (4) of section 373.203, Florida Statutes, are redesignated as subsections (5) and (6), respectively, and new subsections (3) and (4) are added to that section, to read:

373.203 Definitions.—

(3) "Data center" means a facility that primarily contains electronic equipment used to process, store, and transmit digital information, which may be:

(a) A free-standing structure; or

(b) A facility within a larger structure which uses environmental control equipment to maintain the proper conditions for the operation of electronic equipment.

(4) "Large-scale data center" means a single location, with a data center on site, that has an anticipated monthly peak load of 50 megawatts or more, calculated as the highest average load over a 15-minute interval. The term does not include a load aggregated across multiple locations owned by the same customer. However, the term includes all customers or other entities that have entered into a colocation or similar agreement at a single location that otherwise meets the anticipated monthly peak load provided in this subsection.

Section 5. Section 373.262, Florida Statutes, is created to read:

373.262 Large-scale data center permitting.—

(1) It is the intent of the Legislature that the development and operation of large-scale data centers in this state be managed under a permitting framework that ensures this state's water resources are used in the public interest, in a manner that is not harmful to the water resources of this state, and consistent with local government zoning regulations and comprehensive plans.

(2) Consistent with other provisions of this part, the governing board of a water management district or the department may not issue a permit to a large-scale data center applicant for an allocation of water if the proposed use of the water is harmful to the water resources of the area or is prohibited by the applicable local government zoning regulations and comprehensive plan. A permit shall be issued to a large-scale data center applicant for an allocation of water if the applicant establishes that the proposed use of water:

(a) Is a reasonable-beneficial use as defined in s. 373.019;

(b) Will not interfere with any presently existing legal use of water; and

(c) Is consistent with the public interest.

(3) The governing board or the department shall require the use of reclaimed water in lieu of all or a portion of a proposed use of surface water or groundwater by a large-scale data center applicant when:

(a) A suitable reclaimed water supply source is available and permitted;

(b) Reclaimed water distribution or supply lines are available at the property boundary in sufficient capacity and quality to serve the applicant's needs;

(c) The applicant is capable of accessing the reclaimed water source through distribution or supply lines;

(d) Use of reclaimed water is environmentally, economically, and technically feasible; and

(e) Use of reclaimed water would not conflict with the requirements contained in the applicant's surface water discharge permit, if applicable.

(4)(a) In addition to the requirements of s. 373.229, all permit applications made under this part requesting an allocation of at least an average daily flow of 100,000 gallons of water per day by a large-scale data center must contain:

1. All sources and amounts of water and losses of water used for cooling, industrial and treatment processes, personal or sanitary needs of employees, and landscape irrigation; and

2. A water conservation plan that, at a minimum, incorporates recycling cooling water before discharge or disposal, implementation of a leak detection and repair program, use of water efficient fixtures, and implementation of an employee awareness and education program concerning water conservation.

(b) Notwithstanding s. 373.229(4), the governing board or the department may not approve a permit application made under this part by a large-scale data center without a hearing.

Section 6. Subsection (2) of section 373.239, Florida Statutes, is amended to read:

373.239 Modification and renewal of permit terms.—

(2) If the proposed modification involves water use of 100,000 gallons or more per day or is proposed by a large-scale data center as defined in s. 373.203, the application shall be treated under the provisions of s. 373.229 in the same manner as the initial permit application. Otherwise, the governing board or the department may at its discretion approve the proposed modification without a hearing, provided the permittee establishes that:

(a) A change in conditions has resulted in the water allowed under the permit becoming inadequate for the permittee's need, or

(b) The proposed modification would result in a more efficient utilization of water than is possible under the existing permit.

Section 7. The Office of Program Policy Analysis and Government Accountability (OPPAGA) shall contract for an independent, interdisciplinary study of policy considerations related to the construction and operation of large-scale data centers, including, but not limited to, state, regional, or local economic development and tax revenue impacts; use of land, water, and other natural resources; energy use and related cost and rate impacts; and public health and safety related impacts. OPPAGA may contract with one or more nonpartisan academic or nonprofit research organizations with policy and scientific expertise in relevant fields of study. The study must identify any issues unique to the construction and operation of large-scale data centers in this state. The study must also include recommendations on facility siting and mitigation measures that should be considered to reduce any potential negative impacts. OPPAGA shall submit the study to the Governor, the President of the Senate, and the Speaker of the House of Representatives by July 1, 2027.

Section 8. Except as otherwise expressly provided in this act and except for this section, which shall take effect upon becoming a law, this act shall take effect July 1, 2026.

Approved by the Governor May 7, 2026.

Filed in Office Secretary of State May 7, 2026.
