

## Committee Substitute for Senate Bill No. 626

An act relating to the Everglades Forever Act; amending s. 373.4592, F.S.; providing definitions; re-naming the Everglades Swim Plan as the Everglades Long-Term Plan; establishing legislative findings and providing legislative intent; providing that revisions to the Long-Term Plan be incorporated into the plan; requiring implementation of the initial phase of the Long-Term Plan; providing for review by the Department of Environmental Protection of certain projects and incremental phosphorus reduction measures; requiring that the initial phase of the Long-Term Plan achieve water quality standards relating to phosphorus criterion in the Everglades Protection Area; providing for the use of ad valorem tax proceeds; providing a schedule for enhancements to the Everglades Construction Project; deleting obsolete provisions; providing that rules adopting phosphorus criterion may include moderating provisions; requiring that permits issued by the department be based on best available phosphorus reduction technology and include technology-based effluent limitations; providing for computation of the Everglades Agricultural Area privilege tax; implementing the provisions of s. 7(b), Art. II of the State Constitution; providing for the computation of the C-139 agricultural privilege tax; providing permit requirements for long-term compliance permits; repealing s. 3 of chapter 96-412, Laws of Florida; repealing s. 84 of chapter 96-321, Laws of Florida; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsections (2), (3), and (4), paragraphs (c) and (h) of subsection (6), and subsections (7), (10), and (16), of section 373.4592, Florida Statutes, are amended, and subsection (17) of that section is reenacted, to read:

373.4592 Everglades improvement and management.—

(2) DEFINITIONS.—As used in this section:

(a) “Best available phosphorus reduction technology” or “BAPRT” means a combination of BMPs and STAs which includes a continuing research and monitoring program to reduce outflow concentrations of phosphorus so as to achieve the phosphorus criterion in the Everglades Protection Area at the earliest practicable date.

~~(b)(a)~~ “Best management practice” or “BMP” means a practice or combination of practices determined by the district, in cooperation with the department, based on research, field-testing, and expert review, to be the most effective and practicable, including economic and technological considerations, on-farm means of improving water quality in agricultural discharges to a level that balances water quality improvements and agricultural productivity.

~~(c)~~~~(b)~~ “C-139 Basin” or “Basin” means those lands described in subsection (16).

~~(d)~~~~(e)~~ “Department” means the Florida Department of Environmental Protection.

~~(e)~~~~(d)~~ “District” means the South Florida Water Management District.

~~(f)~~~~(e)~~ “Everglades Agricultural Area” or “EAA” means the Everglades Agricultural Area, which are those lands described in subsection (15).

~~(g)~~~~(f)~~ “Everglades Construction Project” means the project described in the February 15, 1994, conceptual design document together with construction and operation schedules on file with the South Florida Water Management District, except as modified by this section and further described in the Long-Term Plan.

~~(h)~~~~(g)~~ “Everglades Program” means the program of projects, regulations, and research provided by this section, including the Everglades Construction Project.

~~(i)~~~~(h)~~ “Everglades Protection Area” means Water Conservation Areas 1, 2A, 2B, 3A, and 3B, the Arthur R. Marshall Loxahatchee National Wildlife Refuge, and the Everglades National Park.

~~(j)~~ “Long-Term Plan” or “Plan” means the district’s “Everglades Protection Area Tributary Basins Conceptual Plan for Achieving Long-Term Water Quality Goals Final Report” dated March 2003, as modified herein.

~~(k)~~~~(i)~~ “Master permit” means a single permit issued to a legally responsible entity defined by rule, authorizing the construction, alteration, maintenance, or operation of multiple stormwater management systems that may be owned or operated by different persons and which provides an opportunity to achieve collective compliance with applicable department and district rules and the provisions of this section.

~~(l)~~ “Optimization” shall mean maximizing the potential treatment effectiveness of the STAs through measures such as additional compartmentalization, improved flow control, vegetation management, or operation refinements, in combination with improvements where practicable in urban and agricultural BMPs, and includes integration with Congressionally authorized components of the Comprehensive Everglades Restoration Plan or “CERP”.

~~(m)~~~~(j)~~ “Phosphorus criterion” means a ~~numeric~~ interpretation for phosphorus of the Class III narrative nutrient criterion.

~~(n)~~~~(k)~~ “Stormwater management program” shall have the meaning set forth in s. 403.031(15).

~~(o)~~~~(l)~~ “Stormwater treatment areas” or “STAs” means those treatment areas described and depicted in the district’s conceptual design document of February 15, 1994, and any modifications as provided in this section.

(p) “Technology-based effluent limitation” or “TBEL” means the technology-based treatment requirements as defined in Rule 62-650.200, Florida Administrative Code.

(3) EVERGLADES LONG-TERM SWIM PLAN.—

(a) The Legislature finds that the Everglades Program required by this section establishes more extensive and comprehensive requirements for surface water improvement and management within the Everglades than the SWIM plan requirements provided in ss. 373.451-373.456. In order to avoid duplicative requirements, and in order to conserve the resources available to the district, the SWIM plan requirements of those sections shall not apply to the Everglades Protection Area and the EAA during the term of the Everglades Program, and the district will neither propose, nor take final agency action on, any Everglades SWIM plan for those areas until the Everglades Program is fully implemented; ~~however, Funds under s. 259.101(3)(b) may be used for acquisition of lands necessary to implement the Everglades Construction Project, to the extent these funds are identified in the Statement of Principles of July 1993. The district’s actions in implementing the Everglades Construction Project relating to the responsibilities of the EAA and C-139 Basin for funding and water quality compliance in the EAA and the Everglades Protection Area shall be governed by this section. Other strategies or activities in the March 1992 Everglades SWIM plan may be implemented if otherwise authorized by law.~~

(b) The Legislature finds that the most reliable means of optimizing the performance of STAs and achieving reasonable further progress in reducing phosphorus entering the Everglades Protection Area is to utilize a long-term planning process. The Legislature finds that the Long-Term Plan provides the best available phosphorus reduction technology based upon a combination of the BMPs and STAs described in the Plan provided that the Plan shall seek to achieve the phosphorus criterion in the Everglades Protection Area. The Long-Term Plan will be implemented and revised with the planning goal and objective of achieving the phosphorus criterion to be adopted pursuant to subparagraph (4)(e)2. in the Everglades Protection Area, and not based on any planning goal or objective in the Plan that is inconsistent with this section. Revisions to the Long-Term Plan shall be incorporated through an adaptive management approach including a process development and engineering component to identify and implement incremental optimization measures for further phosphorus reductions.

(c) It is the intent of the Legislature that implementation of the Long-Term Plan shall be integrated and consistent with the implementation of the projects and activities in the Congressionally authorized components of the CERP so that unnecessary and duplicative costs will be avoided. Nothing in this section shall modify any existing cost share or responsibility provided for projects listed in s. 528 of the Water Resources Development Act of 1996 (110 Stat. 3769) or provided for projects listed in section 601 of the Water Resources Development Act of 2000 (114 Stat. 2572). The Legislature does not intend for the provisions of this section to diminish commitments made by the State of Florida to restore and maintain water quality in the Everglades Protection Area, including the federal lands in the settlement agreement referenced in paragraph (4)(e).

(d) The Legislature recognizes that the Long-Term Plan contains an initial phase and a 10-year second phase. The Legislature intends that a review of this act at least 10 years after implementation of the initial phase is appropriate and necessary to the public interest. The review is the best way to ensure that discharges to the Everglades Protection Area are achieving state water quality standards, including phosphorus reduction, to the maximum extent practicable, and are using the best technology available. A 10-year second phase of the Long-Term Plan must be approved by the Legislature and codified in this act prior to implementation of projects, but not prior to development, review, and approval of projects by the department.

(e) The Long-Term Plan shall be implemented for an initial 13-year phase (2003-2016) and shall, to the maximum extent practicable, achieve water quality standards relating to the phosphorus criterion in the Everglades Protection Area as determined by a network of monitoring stations established for this purpose. Not later than December 31, 2008, and each 5 years thereafter, the department shall review and approve incremental phosphorus reduction measures to be implemented at the earliest practicable date.

(4) EVERGLADES PROGRAM.—

(a) Everglades Construction Project.—The district shall implement the Everglades Construction Project. By the time of completion of the project, the state, district, or other governmental authority shall purchase the in-holdings in the Rotenberger and such other lands necessary to achieve a 2:1 mitigation ratio for the use of Brown's Farm and other similar lands, including those needed for the STA 1 Inflow and Distribution Works. The inclusion of public lands as part of the project is for the purpose of treating waters not coming from the EAA for hydroperiod restoration. It is the intent of the Legislature that the district aggressively pursue the implementation of the Everglades Construction Project in accordance with the schedule in this subsection. The Legislature recognizes that adherence to the schedule is dependent upon factors beyond the control of the district, including the timely receipt of funds from all contributors. The district shall take all reasonable measures to complete timely performance of the schedule in this section in order to finish the Everglades Construction Project. The district shall not delay implementation of the project beyond the time delay caused by those circumstances and conditions that prevent timely performance. The district shall not levy ad valorem taxes in excess of 0.1 mill within the Okeechobee Basin for the purposes of the design, construction, and acquisition of the Everglades Construction Project. The ad valorem tax proceeds not exceeding 0.1 mill levied within the Okeechobee Basin for such purposes shall also be used for design, construction, and implementation of the initial phase of the Long-Term Plan, including operation and maintenance, and research for the projects and strategies in the initial phase of the Long-Term Plan, and including the enhancements and operation and maintenance of the Everglades Construction Project and shall be the sole direct district contribution from district ad valorem taxes appropriated or expended for the design, construction, and acquisition of the Everglades Construction Project unless the Legislature by specific amendment to this section increases the 0.1 mill ad valorem tax contribution, increases the agricultural privilege

taxes, or otherwise reallocates the relative contribution by ad valorem taxpayers and taxpayers paying the agricultural privilege taxes toward the funding of the design, construction, and acquisition of the Everglades Construction Project. Notwithstanding the provisions of s. 200.069 to the contrary, any millage levied under the 0.1 mill limitation in this paragraph shall be included as a separate entry on the Notice of Proposed Property Taxes pursuant to s. 200.069. Once the STAs are completed, the district shall allow these areas to be used by the public for recreational purposes in the manner set forth in s. 373.1391(1) s. 373.59(11), considering the suitability of these lands for such uses. These lands shall be made available for recreational use unless the district governing board can demonstrate that such uses are incompatible with the restoration goals of the Everglades Construction Project or the water quality and hydrological purposes of the STAs or would otherwise adversely impact the implementation of the project. The district shall give preferential consideration to the hiring of agricultural workers displaced as a result of the Everglades Construction Project, consistent with their qualifications and abilities, for the construction and operation of these STAs. The following milestones apply to the completion of the Everglades Construction Project as depicted in the February 15, 1994, conceptual design document:

1. The district must complete the final design of the STA 1 East and West and pursue STA 1 East project components as part of a cost-shared program with the Federal Government. The district must be the local sponsor of the federal project that will include STA 1 East, and STA 1 West if so authorized by federal law. ~~Land acquisition shall be completed for STA 1 West by April 1, 1996, and for STA 1 East by July 1, 1998;~~

2. Construction of STA 1 East is to be completed under the direction of the United States Army Corps of Engineers in conjunction with the currently authorized C-51 flood control project ~~by July 1, 2002;~~

3. The district must complete construction of STA 1 West and STA 1 Inflow and Distribution Works under the direction of the United States Army Corps of Engineers, if the direction is authorized under federal law, in conjunction with the currently authorized C-51 flood control project, ~~by January 1, 1999;~~

~~4. The district must complete construction of STA 2 by February 1, 1999;~~

~~4.5.~~ The district must complete construction of STA 3/4 by October 1, 2003; however, the district may modify this schedule to incorporate and accelerate enhancements to STA 3/4 as directed in the Long-Term Plan;

~~6. The district must complete construction of STA 5 by January 1, 1999; and~~

~~5.7. The district must complete construction of STA 6; by October 1, 1997.~~

6. The district must, by December 31, 2006, complete construction of enhancements to the Everglades Construction Project recommended in the Long-Term Plan and initiate other pre-2006 strategies in the plan; and

7.8- East Beach Water Control District, South Shore Drainage District, South Florida Conservancy District, East Shore Water Control District, and the lessee of agricultural lease number 3420 shall complete any system modifications described in the Everglades Construction Project to the extent that funds are available from the Everglades Fund. These entities shall divert the discharges described within the Everglades Construction Project within 60 days of completion of construction of the appropriate STA. Such required modifications shall be deemed to be a part of each district's plan of reclamation pursuant to chapter 298.

(b) Everglades water supply and hydroperiod improvement and restoration.—

1. A comprehensive program to revitalize the Everglades shall include programs and projects to improve the water quantity reaching the Everglades Protection Area at optimum times and improve hydroperiod deficiencies in the Everglades ecosystem. To the greatest extent possible, wasteful discharges of fresh water to tide shall be reduced, and water conservation practices and reuse measures shall be implemented by water users, consistent with law. Water supply management must include improvement of water quantity reaching the Everglades, correction of long-standing hydroperiod problems, and an increase in the total quantity of water flowing through the system. Water supply management must provide water supply for the Everglades National Park, the urban and agricultural areas, and the Florida Bay and must replace water previously available from the coastal ridge areas of southern Dade County. The Everglades Construction Project redirects some water currently lost to tide. It is an important first step in completing hydroperiod improvement.

2. The district shall operate the Everglades Construction Project as specified in the February 15, 1994, conceptual design document, to provide additional inflows to the Everglades Protection Area. The increased flow from the project shall be directed to the Everglades Protection Area as needed to achieve an average annual increase of 28 percent compared to the baseline years of 1979 to 1988. Consistent with the design of the Everglades Construction Project and without demonstratively reducing water quality benefits, the regulatory releases will be timed and distributed to the Everglades Protection Area to maximize environmental benefits.

3. The district shall operate the Everglades Construction Project in accordance with the February 15, 1994, conceptual design document to maximize the water quantity benefits and improve the hydroperiod of the Everglades Protection Area. All reductions of flow to the Everglades Protection Area from BMP implementation will be replaced. The district shall develop a model to be used for quantifying the amount of water to be replaced. ~~The district shall publish in the Florida Administrative Weekly a notice of rule development on the model no later than July 1, 1994, and a notice of rule-making no later than July 1, 1995.~~ The timing and distribution of this replaced water will be directed to the Everglades Protection Area to maximize the natural balance of the Everglades Protection Area.

4. The Legislature recognizes the complexity of the Everglades watershed, as well as legal mandates under Florida and federal law. As local

sponsor of the Central and Southern Florida Flood Control Project, the district must coordinate its water supply and hydroperiod programs with the Federal Government. Federal planning, research, operating guidelines, and restrictions for the Central and Southern Florida Flood Control Project now under review by federal agencies will provide important components of the district's Everglades Program. The department and district shall use their best efforts to seek the amendment of the authorized purposes of the project to include water quality protection, hydroperiod restoration, and environmental enhancement as authorized purposes of the Central and Southern Florida Flood Control Project, in addition to the existing purposes of water supply, flood protection, and allied purposes. Further, the department and the district shall use their best efforts to request that the Federal Government include in the evaluation of the regulation schedule for Lake Okeechobee a review of the regulatory releases, so as to facilitate releases of water into the Everglades Protection Area which further improve hydroperiod restoration.

5. The district, through cooperation with the federal and state agencies, shall develop other programs and methods to increase the water flow and improve the hydroperiod of the Everglades Protection Area.

6. Nothing in this section is intended to provide an allocation or reservation of water or to modify the provisions of part II. All decisions regarding allocations and reservations of water shall be governed by applicable law.

7. The district shall proceed to expeditiously implement the minimum flows and levels for the Everglades Protection Area as required by s. 373.042 and shall expeditiously complete the Lower East Coast Water Supply Plan.

(c) STA 3/4 modification.—The Everglades Program will contribute to the restoration of the Rotenberger and Holey Land tracts. The Everglades Construction Project provides a first step toward restoration by improving hydroperiod with treated water for the Rotenberger tract and by providing a source of treated water for the Holey Land. It is further the intent of the Legislature that the easternmost tract of the Holey Land, known as the "Toe of the Boot," be removed from STA 3/4 under the circumstances set forth in this paragraph. The district shall proceed to modify the Everglades Construction Project, provided that the redesign achieves at least as many environmental and hydrological benefits as are included in the original design, including treatment of waters from sources other than the EAA, and does not delay construction of STA 3/4. The district is authorized to use eminent domain to acquire alternative lands, only if such lands are located within 1 mile of the northern border of STA 3/4.

(d) Everglades research and monitoring program.—

1. ~~By January 1996,~~ The department and the district shall review and evaluate available water quality data for the Everglades Protection Area and tributary waters and identify any additional information necessary to adequately describe water quality in the Everglades Protection Area and tributary waters. ~~By such date,~~ The department and the district shall also initiate a research and monitoring program to generate such additional information identified and to evaluate the effectiveness of the BMPs and

STAs, as they are implemented, in improving water quality and maintaining designated and existing beneficial uses of the Everglades Protection Area and tributary waters. As part of the program, the district shall monitor all discharges into the Everglades Protection Area for purposes of determining compliance with state water quality standards.

2. The research and monitoring program shall evaluate the ecological and hydrological needs of the Everglades Protection Area, including the minimum flows and levels. Consistent with such needs, the program shall also evaluate water quality standards for the Everglades Protection Area and for the canals of the EAA, so that these canals can be classified in the manner set forth in paragraph (e) and protected as an integral part of the water management system which includes the STAs of the Everglades Construction Project and allows landowners in the EAA to achieve applicable water quality standards compliance by BMPs and STA treatment to the extent this treatment is available and effective.

3. The research and monitoring program shall include research seeking to optimize the design and operation of the STAs, including research to reduce outflow concentrations, and to identify other treatment and management methods and regulatory programs that are superior to STAs in achieving the intent and purposes of this section.

4. The research and monitoring program shall be conducted ~~to allow completion by December 2001 of any research necessary~~ to allow the department to propose a phosphorus criterion in the Everglades Protection Area, and to evaluate existing state water quality standards applicable to the Everglades Protection Area and existing state water quality standards and classifications applicable to the EAA canals. In developing the phosphorus criterion, the department shall also consider the minimum flows and levels for the Everglades Protection Area and the district's water supply plans for the Lower East Coast.

5. ~~The district, in cooperation with the department, shall prepare a peer-reviewed interim report regarding the research and monitoring program, which shall be submitted no later than January 1, 1999, to the Governor, the President of the Senate, and the Speaker of the House of Representatives for their review. The interim report shall summarize all data and findings available as of July 1, 1998, on the effectiveness of STAs and BMPs in improving water quality. The interim report shall also include a summary of the then-available data and findings related to the following: the Lower East Coast Water Supply Plan of the district, the United States Environmental Protection Agency Everglades Mercury Study, the United States Army Corps of Engineers South Florida Ecosystem Restoration Study, the results of research and monitoring of water quality and quantity in the Everglades region, the degree of phosphorus discharge reductions achieved by BMPs and agricultural operations in the region, the current information on the ecological and hydrological needs of the Everglades, and the costs and benefits of phosphorus reduction alternatives. Prior to finalizing the interim report, the district shall conduct at least one scientific workshop and two public hearings on its proposed interim report. One public hearing must be held in Palm Beach County and the other must be held in either Dade or~~

~~Broward County. The interim report shall be used by the department and the district in making any decisions regarding the implementation of the Everglades Construction Project subsequent to the completion of the interim report. The construction of STAs 3/4 shall not be commenced until 90 days after the interim report has been submitted to the Governor and the Legislature.~~

5.6. Beginning January 1, 2000, the district and the department shall annually issue a peer-reviewed report regarding the research and monitoring program that summarizes all data and findings. The department shall provide copies of the report to the Governor, the President of the Senate, and the Speaker of the House of Representatives. The report shall identify water quality parameters, in addition to phosphorus, which exceed state water quality standards or are causing or contributing to adverse impacts in the Everglades Protection Area.

6.7. The district shall continue research seeking to optimize the design and operation of STAs and to identify other treatment and management methods that are superior to STAs in achieving optimum water quality and water quantity for the benefit of the Everglades. The district shall optimize the design and operation of the STAs described in the Everglades Construction Project prior to expanding their size. Additional methods to achieve compliance with water quality standards shall not be limited to more intensive management of the STAs.

(e) Evaluation of water quality standards.—

1. The department and the district shall employ all means practicable to complete by December 31, 1998, any additional research necessary to:

a. Numerically interpret for phosphorus the Class III narrative nutrient criterion necessary to meet water quality standards in the Everglades Protection Area; and

b. Evaluate existing water quality standards applicable to the Everglades Protection Area and EAA canals.

~~This research shall be completed no later than December 31, 2001.~~

2. ~~By December 31, 2001, the department shall file a notice of rulemaking in the Florida Administrative Weekly to establish a phosphorus criterion in the Everglades Protection Area. In no case shall such phosphorus criterion allow waters in the Everglades Protection Area to be altered so as to cause an imbalance in the natural populations of aquatic flora or fauna. The phosphorus criterion shall be 10 parts per billion (ppb) in the Everglades Protection Area in the event the department does not adopt by rule such criterion by December 31, 2003. However, in the event the department fails to adopt a phosphorus criterion on or before December 31, 2002, any person whose substantial interests would be affected by the rulemaking shall have the right, on or before February 28, 2003, to petition for a writ of mandamus to compel the department to adopt by rule such criterion. Venue for the mandamus action must be Leon County. The court may stay implementation of the 10 parts per billion (ppb) criterion during the pendency of the~~

mandamus proceeding upon a demonstration by the petitioner of irreparable harm in the absence of such relief. The department's phosphorus criterion, whenever adopted, shall supersede the 10 parts per billion (ppb) criterion otherwise established by this section, but shall not be lower than the natural conditions of the Everglades Protection Area and shall take into account spatial and temporal variability. The department's rule adopting a phosphorus criterion may include moderating provisions during the implementation of the initial phase of the Long-Term Plan authorizing discharges based upon BAPRT providing net improvement to impacted areas. Discharges to unimpacted areas may also be authorized by moderating provisions, which shall require BAPRT, and which must be based upon a determination by the department that the environmental benefits of the discharge clearly outweigh potential adverse impacts.

3. The department shall use the best available information to define relationships between waters discharged to, and the resulting water quality in, the Everglades Protection Area. The department or the district shall use these relationships to establish discharge limits in permits for discharges into the EAA canals and the Everglades Protection Area necessary to prevent an imbalance in the natural populations of aquatic flora or fauna in the Everglades Protection Area, and to provide a net improvement in the areas already impacted. During the implementation of the initial phase of the Long-Term Plan, permits issued by the department shall be based on BAPRT, and shall include technology-based effluent limitations consistent with the Long-Term Plan. Compliance with the phosphorus criterion shall be based upon a long-term geometric mean of concentration levels to be measured at sampling stations recognized from the research to be reasonably representative of receiving waters in the Everglades Protection Area, and so located so as to assure that the Everglades Protection Area is not altered so as to cause an imbalance in natural populations of aquatic flora and fauna and to assure a net improvement in the areas already impacted. For the Everglades National Park and the Arthur R. Marshall Loxahatchee National Wildlife Refuge, the method for measuring compliance with the phosphorus criterion shall be in a manner consistent with Appendices A and B, respectively, of the settlement agreement dated July 26, 1991, entered in case No. 88-1886-Civ-Hoeveler, United States District Court for the Southern District of Florida, that recognizes and provides for incorporation of relevant research.

4. The department's evaluation of any other water quality standards must include the department's antidegradation standards and EAA canal classifications. In recognition of the special nature of the conveyance canals of the EAA, as a component of the classification process, the department is directed to formally recognize by rulemaking existing actual beneficial uses of the conveyance canals in the EAA. This shall include recognition of the Class III designated uses of recreation, propagation and maintenance of a healthy, well-balanced population of fish and wildlife, the integrated water management purposes for which the Central and Southern Florida Flood Control Project was constructed, flood control, conveyance of water to and from Lake Okeechobee for urban and agricultural water supply, Everglades hydroperiod restoration, conveyance of water to the STAs, and navigation.

(f) EAA best management practices.—

1. The district, in cooperation with the department, shall develop and implement a water quality monitoring program to evaluate the effectiveness of the BMPs in achieving and maintaining compliance with state water quality standards and restoring and maintaining designated and existing beneficial uses. The program shall include an analysis of the effectiveness of the BMPs in treating constituents that are not being significantly improved by the STAs. The monitoring program shall include monitoring of appropriate parameters at representative locations.

2. The district shall continue to require and enforce the BMP and other requirements of chapters 40E-61 and 40E-63, Florida Administrative Code, during the terms of the existing permits issued pursuant to those rules. Chapter 40E-61, Florida Administrative Code, may be amended to include the BMPs required by chapter 40E-63, Florida Administrative Code. Prior to the expiration of existing permits, and during each 5-year term of subsequent permits as provided for in this section, those rules shall be amended to implement a comprehensive program of research, testing, and implementation of BMPs that will address all water quality standards within the EAA and Everglades Protection Area. Under this program:

a. EAA landowners, through the EAA Environmental Protection District or otherwise, shall sponsor a program of BMP research with qualified experts to identify appropriate BMPs.

b. Consistent with the water quality monitoring program, BMPs will be field-tested in a sufficient number of representative sites in the EAA to reflect soil and crop types and other factors that influence BMP design and effectiveness.

c. BMPs as required for varying crops and soil types shall be included in permit conditions in the 5-year permits issued pursuant to this section.

d. The district shall conduct research in cooperation with EAA landowners to identify water quality parameters that are not being significantly improved either by the STAs or the BMPs, and to identify further BMP strategies needed to address these parameters.

3. The Legislature finds that through the implementation of the Everglades BMPs Program and the implementation of the Everglades Construction Project, reasonable further progress will be made towards addressing water quality requirements of the EAA canals and the Everglades Protection Area. Permittees within the EAA and the C-139 Basin who are in full compliance with the conditions of permits under chapters 40E-61 and 40E-63, Florida Administrative Code, have made all payments required under the Everglades Program, and are in compliance with subparagraph (a)8., if applicable, shall not be required to implement additional water quality improvement measures, prior to December 31, 2006, other than those required by subparagraph 2., with the following exceptions:

a. Nothing in this subparagraph shall limit the existing authority of the department or the district to limit or regulate discharges that pose a significant danger to the public health and safety; and

b. New land uses and new stormwater management facilities other than alterations to existing agricultural stormwater management systems for water quality improvements shall not be accorded the compliance established by this section. Permits may be required to implement improvements or alterations to existing agricultural water management systems.

4. As of December 31, 2006, all permits, including those issued prior to that date, shall require implementation of additional water quality measures, taking into account the water quality treatment actually provided by the STAs and the effectiveness of the BMPs. As of that date, no permittee's discharge shall cause or contribute to any violation of water quality standards in the Everglades Protection Area.

5. Effective immediately, landowners within the C-139 Basin shall not collectively exceed an annual average loading of phosphorus of ~~28.7 metric tons~~ based proportionately on the historical rainfall for the C-139 Basin over the period of October 1, 1978, to September 30, 1988. New surface inflows shall not increase the annual average loading of phosphorus stated above. Provided that the C-139 Basin does not exceed this annual average loading, all landowners within the Basin shall be in compliance for that year. Compliance determinations for individual landowners within the C-139 Basin for remedial action, if the Basin is determined by the district to be out of compliance for that year, shall be based on the landowners' proportional share of the total phosphorus loading of ~~28.7 metric tons~~. The total phosphorus discharge load shall be determined as set forth in Appendix B2 of Rule 40E-63, Everglades Program, Florida Administrative Code, by a method consistent with Appendix 40E-63-3, Florida Administrative Code, disregarding the 25-percent phosphorus reduction factor.

6. The district, in cooperation with the department, shall develop and implement a water quality monitoring program to evaluate the quality of the discharge from the C-139 Basin. Upon determination by the department or the district that the C-139 Basin is exceeding any presently existing water quality standards, the district shall require landowners within the C-139 Basin to implement BMPs appropriate to the land uses within the C-139 Basin consistent with subparagraph 2. Thereafter, the provisions of subparagraphs 2.-4. shall apply to the landowners within the C-139 Basin.

(g) Monitoring and control of exotic species.—

1. The district shall establish a biological monitoring network throughout the Everglades Protection Area and shall prepare a survey of exotic species at least every 2 years.

2. In addition, the district shall establish a program to coordinate with federal, state, or other governmental entities the control of continued expansion and the removal of these exotic species. The district's program shall give high priority to species affecting the largest areal extent within the Everglades Protection Area.

(6) EVERGLADES AGRICULTURAL PRIVILEGE TAX.—

(c) The initial Everglades agricultural privilege tax roll shall be certified for the tax notices mailed in November 1994. Incentive credits to the Everglades agricultural privilege taxes to be included on the initial Everglades agricultural privilege tax roll, if any, shall be based upon the total phosphorus load reduction for the year ending April 30, 1993. The Everglades agricultural privilege taxes for each year shall be computed in the following manner:

1. Annual Everglades agricultural privilege taxes shall be charged for the privilege of conducting an agricultural trade or business on each acre of real property or portion thereof. The annual Everglades agricultural privilege tax shall be \$24.89 per acre for the tax notices mailed in November 1994 through November 1997; \$27 per acre for the tax notices mailed in November 1998 through November 2001; \$31 per acre for the tax notices mailed in November 2002 through November 2005; and \$35 per acre for the tax notices mailed in November 2006 through November 2013.

2. It is the intent of the Legislature to encourage the performance of best management practices to maximize the reduction of phosphorus loads at points of discharge from the EAA by providing an incentive credit against the Everglades agricultural privilege taxes set forth in subparagraph 1. The total phosphorus load reduction shall be measured for the entire EAA by comparing the actual measured total phosphorus load attributable to the EAA for each annual period ending on April 30 to the total estimated phosphorus load that would have occurred during the 1979-1988 base period using the model for total phosphorus load determinations provided in chapter 40E-63, Florida Administrative Code, utilizing the technical information and procedures contained in Section IV-EAA Period of Record Flow and Phosphorus Load Calculations; Section V-Monitoring Requirements; and Section VI-Phosphorus Load Allocations and Compliance Calculations of the Draft Technical Document in Support of chapter 40E-63, Florida Administrative Code - Works of the District within the Everglades, March 3, 1992, and the Standard Operating Procedures for Water Quality Collection in Support of the Everglades Water Condition Report, dated February 18, 1994. The model estimates the total phosphorus load that would have occurred during the 1979-1988 base period by substituting the rainfall conditions for such annual period ending April 30 for the conditions that were used to calibrate the model for the 1979-1988 base period. The data utilized to calculate the actual loads attributable to the EAA shall be adjusted to eliminate the effect of any load and flow that were not included in the 1979-1988 base period as defined in chapter 40E-63, Florida Administrative Code. The incorporation of the method of measuring the total phosphorus load reduction provided in this subparagraph is intended to provide a legislatively approved aid to the governing board of the district in making an annual ministerial determination of any incentive credit.

3. Phosphorus load reductions calculated in the manner described in subparagraph 2. and rounded to the nearest whole percentage point for each annual period beginning on May 1 and ending on April 30 shall be used to compute incentive credits to the Everglades agricultural privilege taxes to be included on the annual tax notices mailed in November of the next ensuing calendar year. Incentive credits, if any, will reduce the Everglades

agricultural privilege taxes set forth in subparagraph 1. only to the extent that the phosphorus load reduction exceeds 25 percent. Subject to subparagraph 4., the reduction of phosphorus load by each percentage point in excess of 25 percent, computed for the 12-month period ended on April 30 of the calendar year immediately preceding certification of the Everglades agricultural privilege tax, shall result in the following incentive credits: \$0.33 per acre for the tax notices mailed in November 1994 through November 1997; \$0.54 per acre for the tax notices mailed in November 1998 through November 2001; \$0.61 per acre for the tax notices mailed in November 2002 through November 2005, and \$0.65 per acre for the tax notices mailed in November 2006 through November 2013. The determination of incentive credits, if any, shall be documented by resolution of the governing board of the district adopted prior to or at the time of the adoption of its resolution certifying the annual Everglades agricultural privilege tax roll to the appropriate tax collector.

4. Notwithstanding subparagraph 3., incentive credits for the performance of best management practices shall not reduce the minimum annual Everglades agricultural privilege tax to less than \$24.89 per acre, which annual Everglades agricultural privilege tax as adjusted in the manner required by paragraph (e) shall be known as the "minimum tax." To the extent that the application of incentive credits for the performance of best management practices would reduce the annual Everglades agricultural privilege tax to an amount less than the minimum tax, then the unused or excess incentive credits for the performance of best management practices shall be carried forward, on a phosphorus load percentage basis, to be applied as incentive credits in subsequent years. Any unused or excess incentive credits remaining after certification of the Everglades agricultural privilege tax roll for the tax notices mailed in November 2013 shall be canceled.

5. Notwithstanding the schedule of Everglades agricultural privilege taxes set forth in subparagraph 1., the owner, lessee, or other appropriate interestholder of any property shall be entitled to have the Everglades agricultural privilege tax for any parcel of property reduced to the minimum tax, commencing with the tax notices mailed in November 1996 for parcels of property participating in the early baseline option as defined in chapter 40E-63, Florida Administrative Code, and with the tax notices mailed in November 1997 for parcels of property not participating in the early baseline option, upon compliance with the requirements set forth in this subparagraph. The owner, lessee, or other appropriate interestholder shall file an application with the executive director of the district prior to July 1 for consideration of reduction to the minimum tax on the Everglades agricultural privilege tax roll to be certified for the tax notice mailed in November of the same calendar year and shall have the burden of proving the reduction in phosphorus load attributable to such parcel of property. The phosphorus load reduction for each discharge structure serving the parcel shall be measured as provided in chapter 40E-63, Florida Administrative Code, and the permit issued for such property pursuant to chapter 40E-63, Florida Administrative Code. A parcel of property which has achieved the following annual phosphorus load reduction standards shall have the minimum tax included on the annual tax notice mailed in November of the next ensuing calendar year: 30 percent or more for the tax notices mailed in November 1994

through November 1997; 35 percent or more for the tax notices mailed in November 1998 through November 2001; 40 percent or more for the tax notices mailed in November 2002 through November 2005; and 45 percent or more for the tax notices mailed in November 2006 through November 2013. In addition, any parcel of property that achieves an annual flow weighted mean concentration of 50 parts per billion (ppb) of phosphorus at each discharge structure serving the property for any year ending April 30 shall have the minimum tax included on the annual tax notice mailed in November of the next ensuing calendar year. Any annual phosphorus reductions that exceed the amount necessary to have the minimum tax included on the annual tax notice for any parcel of property shall be carried forward to the subsequent years' phosphorus load reduction to determine if the minimum tax shall be included on the annual tax notice. The governing board of the district shall deny or grant the application by resolution adopted prior to or at the time of the adoption of its resolution certifying the annual Everglades agricultural privilege tax roll to the appropriate tax collector.

6. The annual Everglades agricultural privilege tax for the tax notices mailed in November 2014 through November 2016 shall be \$25 per acre and for tax notices mailed in November 2017 and thereafter shall be \$10 per acre.

(h) In recognition of the findings set forth in subsection (1), the Legislature finds that the assessment and use of the Everglades agricultural privilege tax is a matter of concern to all areas of Florida and the Legislature intends this act to be a general law authorization of the tax within the meaning of s. 9, Art. VII of the State Constitution and that payment of the tax complies with the obligations of owners and users of land under s. 7(b), Art. II of the State Constitution.

(7) C-139 AGRICULTURAL PRIVILEGE TAX.—

(a) There is hereby imposed an annual C-139 agricultural privilege tax for the privilege of conducting an agricultural trade or business on:

1. All real property located within the C-139 Basin that is classified as agricultural under the provisions of chapter 193; and

2. Leasehold or other interests in real property located within the C-139 Basin owned by the United States, the state, or any agency thereof permitting the property to be used for agricultural purposes in a manner that would result in such property being classified as agricultural under the provisions of chapter 193 if not governmentally owned, whether or not such property is actually classified as agricultural under the provisions of chapter 193.

It is hereby determined by the Legislature that the privilege of conducting an agricultural trade or business on such property constitutes a reasonable basis for imposing the C-139 agricultural privilege tax and that logical differences exist between the agricultural use of such property and the use of other property within the C-139 Basin for residential or nonagricultural

commercial use. The C-139 agricultural privilege tax shall constitute a lien against the property, or the leasehold or other interest in governmental property permitting such property to be used for agricultural purposes, described on the C-139 agricultural privilege tax roll. The lien shall be in effect from January 1 of the year the tax notice is mailed until discharged by payment and shall be equal in rank and dignity with the liens of all state, county, district, or municipal taxes and non-ad valorem assessments imposed pursuant to general law, special act, or local ordinance and shall be superior in dignity to all other liens, titles, and claims.

(b) The C-139 agricultural privilege tax, other than for leasehold or other interests in governmental property permitting such property to be used for agricultural purposes, shall be collected in the manner provided for ad valorem taxes. By September 15 of each year, the governing board of the district shall certify by resolution a C-139 agricultural privilege tax roll on compatible electronic medium to the tax collector of each county in which a portion of the C-139 Basin is located. The district shall also produce one copy of the roll in printed form which shall be available for inspection by the public. The district shall post the C-139 agricultural privilege tax for each parcel on the roll. The tax collector shall not accept any such roll that is not certified on compatible electronic medium and that does not contain the posting of the C-139 agricultural privilege tax for each parcel. It is the responsibility of the district that such rolls be free of errors and omissions. Alterations to such rolls may be made by the executive director of the district, or a designee, up to 10 days before certification. If the tax collector or any taxpayer discovers errors or omissions on such roll, such person may request the district to file a corrected roll or a correction of the amount of any C-139 agricultural privilege tax. Other than for leasehold or other interests in governmental property permitting such property to be used for agricultural purposes, C-139 agricultural privilege taxes collected pursuant to this section shall be included in the combined notice for ad valorem taxes and non-ad valorem assessments provided for in s. 197.3635. Such C-139 agricultural privilege taxes shall be listed in the portion of the combined notice utilized for non-ad valorem assessments. A separate mailing is authorized only as a solution to the most exigent factual circumstances. However, if a tax collector cannot merge a C-139 agricultural privilege tax roll to produce such a notice, the tax collector shall mail a separate notice of C-139 agricultural privilege taxes or shall direct the district to mail such a separate notice. In deciding whether a separate mailing is necessary, the tax collector shall consider all costs to the district and taxpayers of such a separate mailing and the adverse effects to the taxpayers of delayed and multiple notices. The district shall bear all costs associated with any separate notice. C-139 agricultural privilege taxes collected pursuant to this section shall be subject to all collection provisions of chapter 197, including provisions relating to discount for early payment, prepayment by installment method, deferred payment, penalty for delinquent payment, and issuance and sale of tax certificates and tax deeds for nonpayment. C-139 agricultural privilege taxes for leasehold or other interests in property owned by the United States, the state, or any agency thereof permitting such property to be used for agricultural purposes shall be included on the notice provided pursuant to s. 196.31, a copy of which shall be provided to lessees or other interestholders registering with the district, and shall be collected

from the lessee or other appropriate interestholder and remitted to the district immediately upon collection. C-139 agricultural privilege taxes included on the statement provided pursuant to s. 196.31 shall be due and collected on or prior to the next April 1 following provision of the notice. Proceeds of the C-139 agricultural privilege taxes shall be distributed by the tax collector to the district. Each tax collector shall be paid a commission equal to the actual cost of collection, not to exceed 2 percent, on the amount of C-139 agricultural privilege taxes collected and remitted. Notwithstanding any general law or special act to the contrary, C-139 agricultural privilege taxes shall not be included on the notice of proposed property taxes provided in s. 200.069.

(c)1. The initial C-139 agricultural privilege tax roll shall be certified for the tax notices mailed in November 1994. The C-139 agricultural privilege taxes for the tax notices mailed in November 1994 through November 2002 ~~2013~~ shall be computed by dividing \$654,656 by the number of acres included on the C-139 agricultural privilege tax roll for such year, excluding any property located within the C-139 Annex.

2. The C-139 agricultural privilege taxes for the tax notices mailed in November 2003 through November 2013 shall be computed by dividing \$654,656 by the number of acres included on the C-139 agricultural privilege tax roll for November 2001, excluding any property located within the C-139 Annex.

3. The C-139 agricultural privilege taxes for the tax notices mailed in November 2014 and thereafter shall be \$1.80 per acre.

(d) For purposes of this paragraph, "vegetable acreage" means, for each tax year, any portion of a parcel of property used for a period of not less than 8 months for the production of vegetable crops, including sweet corn, during the 12 months ended September 30 of the year preceding the tax year. Land preparation, crop rotation, and fallow periods shall not disqualify property from classification as vegetable acreage if such property is actually used for the production of vegetable crops.

1. If either the Governor, the President of the United States, or the United States Department of Agriculture declares the existence of a state of emergency or disaster resulting from extreme natural conditions impairing the ability of vegetable acreage to produce crops, payment of the C-139 agricultural privilege taxes imposed for the privilege of conducting an agricultural trade or business on such property shall be deferred for a period of 1 year, and all subsequent annual payments shall be deferred for the same period.

a. If the declaration occurs between April 1 and October 31, the C-139 agricultural privilege tax to be included on the next annual tax notice will be deferred to the subsequent annual tax notice.

b. If the declaration occurs between November 1 and March 31 and the C-139 agricultural privilege tax included on the most recent tax notice has not been paid, such C-139 agricultural privilege tax will be deferred to the next annual tax notice.

c. If the declaration occurs between November 1 and March 31 and the C-139 agricultural privilege tax included on the most recent tax notice has been paid, the C-139 agricultural privilege tax to be included on the next annual tax notice will be deferred to the subsequent annual tax notice.

2. In the event payment of C-139 agricultural privilege taxes is deferred pursuant to this paragraph, the district must record a notice in the official records of each county in which vegetable acreage subject to such deferment is located. The recorded notice must describe each parcel of property as to which C-139 agricultural privilege taxes have been deferred and the amount deferred for such property. If all or any portion of the property as to which C-139 agricultural privilege taxes have been deferred ceases to be classified as agricultural under the provisions of chapter 193 or otherwise subject to the C-139 agricultural privilege tax, all deferred amounts must be included on the tax notice for such property mailed in November of the first tax year for which such property is not subject to the C-139 agricultural privilege tax. After a property owner has paid all outstanding C-139 agricultural privilege taxes, including any deferred amounts, the district shall provide the property owner with a recordable instrument evidencing the payment of all outstanding amounts.

3. The owner, lessee, or other appropriate interestholder shall file an application with the executive director of the district prior to July 1 for classification of a portion of the property as vegetable acreage on the C-139 agricultural privilege tax roll to be certified for the tax notice mailed in November of the same calendar year and shall have the burden of proving the number of acres used for the production of vegetable crops during the year in which incentive credits are determined and the period of such use. The governing board of the district shall deny or grant the application by resolution adopted prior to or at the time of the adoption of its resolution certifying the annual C-139 agricultural privilege tax roll to the appropriate tax collector.

4. This paragraph does not relieve vegetable acreage from the performance of best management practices specified in chapter 40E-63, Florida Administrative Code.

(e) Any owner, lessee, or other appropriate interestholder of property subject to the C-139 agricultural privilege tax may contest the C-139 agricultural privilege tax by filing an action in circuit court.

1. No action may be brought to contest the C-139 agricultural privilege tax after 60 days from the date the tax notice that includes the C-139 agricultural privilege tax is mailed by the tax collector. Before an action to contest the C-139 agricultural privilege tax may be brought, the taxpayer shall pay to the tax collector the amount of the C-139 agricultural privilege tax which the taxpayer admits in good faith to be owing. The tax collector shall issue a receipt for the payment and the receipt shall be filed with the complaint. Payment of an C-139 agricultural privilege tax shall not be deemed an admission that such tax was due and shall not prejudice the right to bring a timely action to challenge such tax and seek a refund. No action to contest the C-139 agricultural privilege tax may be maintained, and such

action shall be dismissed, unless all C-139 agricultural privilege taxes imposed in years after the action is brought, which the taxpayer in good faith admits to be owing, are paid before they become delinquent. The requirements of this paragraph are jurisdictional.

2. In any action involving a challenge of the C-139 agricultural privilege tax, the court shall assess all costs. If the court finds that the amount of tax owed by the taxpayer is greater than the amount the taxpayer has in good faith admitted and paid, it shall enter judgment against the taxpayer for the deficiency and for interest on the deficiency at the rate of 12 percent per year from the date the tax became delinquent. If it finds that the amount of tax which the taxpayer has admitted to be owing is grossly disproportionate to the amount of tax found to be due and that the taxpayer's admission was not made in good faith, the court shall also assess a penalty at the rate of 25 percent of the deficiency per year from the date the tax became delinquent. The court may issue injunctions to restrain the sale of property for any C-139 agricultural privilege tax which appears to be contrary to law or equity.

(f) Notwithstanding any contrary provisions in chapter 120, or any provision of any other law, an action in circuit court shall be the exclusive remedy to challenge the assessment of an C-139 agricultural privilege tax and owners of property subject to the C-139 agricultural privilege tax shall have no right or standing to initiate administrative proceedings under chapter 120 to challenge the assessment of an C-139 agricultural privilege tax including specifically, and without limitation, the annual certification by the district governing board of the C-139 agricultural privilege tax roll to the appropriate tax collector, the denial of an application for exclusion from the C-139 agricultural privilege tax, and the denial of any application for classification as vegetable acreage, deferment of payment for vegetable acreage, or correction of any alleged error in the C-139 agricultural privilege tax roll.

(g) In recognition of the findings set forth in subsection (1), the Legislature finds that the assessment and use of the C-139 agricultural privilege tax is a matter of concern to all areas of Florida and the Legislature intends this section to be a general law authorization of the tax within the meaning of s. 9, Art. VII of the State Constitution.

(10) **LONG-TERM COMPLIANCE PERMITS.**—By December 31, 2006, the department and the district shall take such action as may be necessary to implement the pre-2006 projects and strategies of the Long-Term Plan so that water delivered to the Everglades Protection Area achieves in all parts of the Everglades Protection Area state water quality standards, including the phosphorus criterion and moderating provisions. ~~in all parts of the Everglades Protection Area.~~

(a) By December 31, 2003, the district shall submit to the department an application for permit modification to incorporate proposed changes to the Everglades Construction Project and other district works delivering water to the Everglades Protection Area as needed to implement the pre-2006 projects and strategies of the Long-Term Plan in all permits issued by the department, including the permits issued pursuant to subsection (9). These

changes shall be designed to achieve state water quality standards, including the phosphorus criterion and moderating provisions, to the maximum extent practicable. Under no circumstances shall the project or strategy cause or contribute to violation of state water quality standards. During the implementation of the initial phase of the Long-Term Plan, permits issued by the department shall be based on BAPRT, and shall include technology-based effluent limitations consistent with the Long-Term Plan, as provided in subparagraph (4)(e)3. By December 31, 2003, the district shall submit to the department a permit modification to incorporate proposed changes to the Everglades Construction Project and the permits issued pursuant to subsection (9). These changes shall be designed to achieve compliance with the phosphorus criterion and the other state water quality standards by December 31, 2006.

~~(b) If the Everglades Construction Project or other discharges to the Everglades Protection Area are not in compliance with state water quality standards, the permit application shall include:~~

~~1. A plan for achieving compliance with the phosphorus criterion in the Everglades Protection Area.~~

~~2. A plan for achieving compliance in the Everglades Protection Area with state water quality standards other than the phosphorus criterion.~~

~~3. Proposed cost estimates for the plans referred to in subparagraphs 1. and 2.~~

~~4. Proposed funding mechanisms for the plans referred to in subparagraphs 1. and 2.~~

~~5. Proposed schedules for implementation of the plans referred to in subparagraphs 1. and 2.~~

(b)(e) If the Everglades Construction Project or other discharges to the Everglades Protection Area are in compliance with state water quality standards, including the phosphorus criterion, the permit application shall include:

1. A plan for maintaining compliance with the phosphorus criterion in the Everglades Protection Area.

2. A plan for maintaining compliance in the Everglades Protection Area with state water quality standards other than the phosphorus criterion.

(16) DEFINITION OF C-139 BASIN.—For purposes of this section:

(a) “C-139 Basin” or “Basin” means the following described property: beginning at the intersection of an easterly extension of the south bank of Deer Fence Canal with the center line of South Florida Water Management District’s Levee 3 in Section 33, Township 46 South, Range 34 East, Hendry County, Florida; thence, westerly along said easterly extension and along the South bank of said Deer Fence Canal to where it intersects the center line of State Road 846 in Section 33, Township 46 South, Range 32 East;

thence, departing from said top of bank to the center line of said State Road 846, westerly along said center line of said State Road 846 to the West line of Section 4, Township 47 South, Range 31 East; thence, northerly along the West line of said section 4, and along the west lines of Sections 33 and 28, Township 46 South, Range 31 East, to the northwest corner of said Section 28; thence, easterly along the North line of said Section 28 to the North one-quarter ( $N\frac{1}{4}$ ) corner of said Section 28; thence, northerly along the West line of the Southeast one-quarter ( $SE\frac{1}{4}$ ) of Section 21, Township 46 South, Range 31 East, to the northwest corner of said Southeast one-quarter ( $SE\frac{1}{4}$ ) of Section 21; thence, easterly along the North line of said Southeast one-quarter ( $SE\frac{1}{4}$ ) of Section 21 to the northeast corner of said Southeast one-quarter ( $SE\frac{1}{4}$ ) of Section 21; thence, northerly along the East line of said Section 21 and the East line of Section 16, Township 46 South, Range 31, East, to the northeast corner thereof; thence, westerly along the North line of said Section 16, to the northwest corner thereof; thence, northerly along the West line of Sections 9 and 4, Township 46 South, Range 31, East, to the northwest corner of said Section 4; thence, westerly along the North lines of Section 5 and Section 6, Township 46 South, Range 31 East, to the South one-quarter ( $S\frac{1}{4}$ ) corner of Section 31, Township 45 South, Range 31 East; thence, northerly to the South one-quarter ( $S\frac{1}{4}$ ) corner of Section 30, Township 45 South, Range 31 East; thence, easterly along the South line of said Section 30 and the South lines of Sections 29 and 28, Township 45 South, Range 31 East, to the Southeast corner of said Section 28; thence, northerly along the East line of said Section 28 and the East lines of Sections 21 and 16, Township 45 South, Range 31 East, to the Northwest corner of the Southwest one-quarter of the Southwest one-quarter ( $SW\frac{1}{4}$  of the  $SW\frac{1}{4}$ ) of Section 15, Township 45 South, Range 31 East; thence, northeasterly to the east one-quarter ( $E\frac{1}{4}$ ) corner of Section 15, Township 45 South, Range 31 East; thence, northerly along the East line of said Section 15, and the East line of Section 10, Township 45 South, Range 31 East, to the center line of a road in the Northeast one-quarter ( $NE\frac{1}{4}$ ) of said Section 10; thence, generally easterly and northeasterly along the center line of said road to its intersection with the center line of State Road 832; thence, easterly along said center line of said State Road 832 to its intersection with the center line of State Road 833; thence, northerly along said center line of said State Road 833 to the north line of Section 9, Township 44 South, Range 32 East; thence, easterly along the North line of said Section 9 and the north lines of Sections 10, 11 and 12, Township 44 South, Range 32 East, to the northeast corner of Section 12, Township 44 South, Range 32 East; thence, easterly along the North line of Section 7, Township 44 South, Range 33 East, to the center line of Flaghole Drainage District Levee, as it runs to the east near the northwest corner of said Section 7, Township 44 South, Range 33 East; thence, easterly along said center line of the Flaghole Drainage District Levee to where it meets the center line of South Florida Water Management District's Levee 1 at Flag Hole Road; thence, continue easterly along said center line of said Levee 1 to where it turns south near the Northwest corner of Section 12, Township 44 South, Range 33 East; thence, Southerly along said center line of said Levee 1 to where the levee turns east near the Southwest corner of said Section 12; thence, easterly along said center line of said Levee 1 to where it turns south near the Northeast corner of Section 17, Township 44 South, Range 34 East; thence, southerly along said center line of said Levee

1 and the center line of South Florida Water Management District's Levee 2 to the intersection with the north line of Section 33, Township 45 South, Range 34 East; thence, easterly along the north line of said Section 33 to the northeast corner of said Section 33; thence, southerly along the east line of said Section 33 to the southeast corner of said Section 33; thence, southerly along the east line of Section 4, Township 46 South, Range 34 East to the southeast corner of said Section 4; thence, westerly along the south line of said Section 4 to the intersection with the centerline of South Florida Water Management District's Levee 2; thence, southerly along said Levee 2 centerline and South Florida Water Management District's Levee 3 centerline to the POINT OF BEGINNING.

(b) Sections 21, 28, and 33, Township 46 South, Range 31 East, are not included within the boundary of the C-139 Basin.

(c)(b) If the district issues permits in accordance with all applicable rules allowing water from the "C-139 Annex" to flow into the drainage system for the C-139 Basin, the C-139 Annex shall be added to the C-139 Basin for all tax years thereafter, commencing with the next C-139 agricultural privilege tax roll certified after issuance of such permits. "C-139 Annex" means the following described property: that part of the S.E.  $\frac{1}{4}$  of Section 32, Township 46 South, Range 34 East and that portion of Sections 5 and 6, Township 47 South, Range 34 East lying west of the L-3 Canal and South of the Deer Fence Canal; all of Sections 7, 17, 18, 19, 20, 28, 29, 30, 31, 32, 33, and 34, and that portion of Sections 8, 9, 16, 21, 22, 26, 27, 35, and 36 lying south and west of the L-3 Canal, in Township 47 South, Range 34 East; and all of Sections 2, 3, 4, 5, 6, 8, 9, 10, and 11 and that portion of Section 1 lying south and west of the L-3 Canal all in Township 48 South, Range 34 East.

(17) SHORT TITLE.—This section shall be known as the "Everglades Forever Act."

Section 2. Section 3 of chapter 96-412, Laws of Florida, and section 84 of chapter 96-321, Laws of Florida, are repealed.

Section 3. This act shall take effect upon becoming a law.

Approved by the Governor May 20, 2003.

Filed in Office Secretary of State May 20, 2003.
